R.R. 1,
Moffat, Ont., Canada,
June 25/68.

Dear Harold,

Thank you for your letter of the 14th, and for the various enclosures. They are useful to me.

I have been in touch with Bernabei and Sprague regarding the position of the windows in the various photo's. To date we have been unable to find out who opened the window in question, and I don't think we will. Thanks also for the suggestions regarding Day's testimony, Baker's Dozen etc. I believe I will use some of this in my Appendix regarding this window. I hope you do not mind the repetition of this evidence, but I believe that many Canadians will find it new and interesting. Thanks again for your permission to use this work. Don't know what I'd do without you and your kind help. Only hope I can repay you some day.

As you suggested in your letter, I am trying to make it as clear as possible the way in which the FBI, the junior members of the staff, and other's deliberately withheld evidence from the Commission, and still are to this day, especially the FBI. The withholding of evidence from the Archive's and the permanent record is deliberate and well illustrated by the Similas case alone.

I would like you to write the introduction to my book as soon as possible. I am really looking forward to receiving it. As for the length of it, I will leave that up to you. I think it will help me in finding a publisher as your name is known in this field of work. I am working hard on my book and hope to have it completed to my satisfaction within two weeks.

You may or may not know by now, but I spent an enjoyable two days with Trent Gough in Toronto last week. We were doing some work pertaining to James Earl Ray and his stay in Toronto. We also had the "Frenchy" photo's etc. The results were encouraging, but I am sure Trent can tell you more about it than I. I more or less tried to help in whatever way I could. If you have any questions, please let me know and I will try to answer them.

One interesting bit of information I ran across in the 26 Volumes has to do with the death of Oswald. One question which I knew plagued Penn Jones in the past was who was the idiot who administered oxygen to Oswald. The answer can be found in Bieberdorf Exhibit #123(19H1x2x6). He is the one who did it. He also describes how Oswald began to "thrash" about and attempted to remove the resuscitator cup from his mouth just before reaching Parkland. No wonder, he probably realized that Bieberdorf was killing him. I cannot think of a worse thing to do to Oswald. If you look at the pictures of Oswald printed in Four Days, you will notice that he is definately alive and would appear to be conscious. The results of Bieberdorf's aid can be found in Oswald's autopsy report. I think you will find that over 2 quarts of blood were removed from his stomach. Someone should ask Bieberdorf about this some time.

Well, I must go for now as I have to get back to my book. Write soon. Thanks once again for everything.

Harry
